## Introduction

The following specification shall be used as the basis for creating EDIFACT-message INVOIC between Pagero and the invoiceissuer/invoicerecipient.

## Standard

Pagero use D.96A for receiving EDIFACT invoices.

Pagero use UNOC syntax and defines separators in the UNA-segment as follows: UNA:+.? ‘

## How to Use these Guidelines

The codes shown under the codes heading are those recommended for use within the particular segment and others will not usually be required unless stated otherwise.

The following terms are used to indicate the particular usage of a segment or element. Where a group is optional then any mandatory segments in it are only mandatory if the group is used. Where a segment is optional then any mandatory elements within it are only mandatory when the segment is used:

<b>MANDATORY (M)</b>	Must be used - As defined by UN EDIFACT
<b>REQUIRED (R)</b>	Should always be used in transmissions
<b>DEPENDENT (D)</b>	Usage is determined by specified conditions
<b>OPTIONAL (O)</b>	May be used by trading partners by agreement
<b>NOT USED (NU)</b>	Not normally required

Where a group or segment is not referred to, this means it is not required to be sent in a transmission of the message. Where a segment is MANDATORY, REQUIRED, DEPENDENT or OPTIONAL and element details are given with appropriate codes, then these are the only elements required in that segment. The complete UN message layout definition, from which this subset has been derived, is provided at [http://live.unece.org/trade/untidid/down\\_index.htm](http://live.unece.org/trade/untidid/down_index.htm).
